EXecutive Irons

The EXecutive iron has stronger loft for more distance, is a deep cavity back, perimeter weighted iron with a wider sole, and an oversized face. The result is an iron that encompasses true forgiveness. An iron that is easy to hit, and has a very high MOI that makes each shot amazingly accurate, regardless of your handicap.

- Good for High to Low handicappers
- 431 Stainless Steel deep cavity perimeter weighted design
- .370 hosel diameter
- loft and lie adjustable

EXecutive Iron Specifications

Iron	5	6	7	8	9	PW	AW	+ or -

Lie	60.5	61	61.5	62	62.5	63	63	2
Weight	256	263	270	277	284	291	298	3

Material: 431 Stainless Steel
Hosel OD 13.5 mm
Hosel ID .370

CNC 1913 Wedges

The right bounce for each loft to hit the right shot with the right wedge.

The V'ed off sole grind making it more narrow so you can use it even on fairly tight lies

The rounded heel to make it easy to lay the face open for flop shots

Whether it's the 52° to fill the gap between the PW and SW, the 56° SW that works in shallow traps and fluffy or deep traps depending on how much you lay it open, or the 60° to pop those missed approaches over a trap, these wedges work!

Try a matched set of wedges made only for your short game and less than full shots, not built for full shots. You'll be amazed at how much your short game will improve.

CNC 1913 Wedge Specifications

				+/-
Loft (°)	52	56	60	1
Lie (°)	63	63	63	1
Bounce (°)	8	12	10	1
